This guide is provided by RIA, member of the PLATINA project.

### **About PLATINA**

The NAIADES action plan is a Commission initiative to enhance the use of inland navigation as part of intermodal freight solutions, in order to create a sustainable, competitive and environmentally friendly European wide transport network.

This objective was embraced by the inland navigation sector, who, together with the Commission have created PLATINA, an FP7 project consisting of 23 partners from nine different countries, in order to accelerate the achievement of the NAIADES aims. This multi-disciplinary knowledge network will allow PLATINA to create the momentum necessary to achieve the NAIADES objectives. - For more info – [www.naiades.info/platina](http://www.naiades.info/platina)

### **Disclaimer**

Platina is funded by the Directorate-General for Mobility and Transport of the European Commission under the 7th Framework Programme for Research and Technological Development. The views expressed in the working papers, deliverables and reports are those of the project consortium partners. These views have not been adopted or approved by the Commission and should not be relied upon as a statement of the Commission's or its services' views. The European Commission does not guarantee the accuracy of the data included in the working papers and reports, nor does it accept responsibility for any use made thereof.
